SLEEP

Sweet dreams

Most animals sleep, or seem to. It's difficult to tell if a worm or other simple animal is sleeping, but we do know that all mammals and most reptiles sleep, and possibly dream.

Giraffes, horses, and many other grazing animals often sleep standing up. This helps them escape or defend themselves if danger threatens. Bats sleep upside down, a position that allows them to take flight by simply letting go.

How many hours in a 24-hour day do animals sleep?

giraffe 2½ hours of sleep

elephant 3½ hours of sleep

human 8 hours of sleep

dog 10½ hours of sleep

cat 13 hours of sleep
